

# THERRIEN TOPPER

Virtually any area of natural grass can benefit from an application of good rich organic topdressing at least once a year. The Therrien - Topper is designed to apply topdressing evenly on small to medium sized high wear turfgrass areas or residential lawns. The spreading drum is wheel driven and has a spread width of 24". You can also spread composted manure, peat moss or vermiculite. The capacity of the Therrien - Topper is approximately 2.5 cubic feet. Topdressing turfgrass areas after overseeding will help to ensure faster growth and thicker grass plants.

THE THERRIEN TOPPER IS  
EQUIPED WITH AJUSTABLE  
FRONT AND REAR BRUSHES  
TO EASILY CONTROL THE  
FLOW RATE OR MATERIALS.
